

Dermatological solutions from Personna®

Accutec Blades Inc manufacture the Personna® range of medical blades in Virginia USA and specialise in the Dermatology area with products designed to support the Dermatologist.

Accutec Blades Inc are ISO 9001 and ISO 14385 compliant and the Personna® Medical range is CE approved for use in the UK and Europe. All products are made in USA.

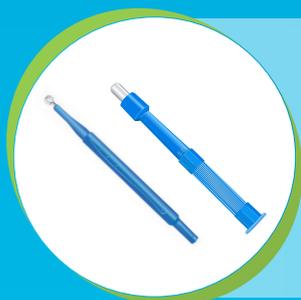

DermaBlade®

Personna's Dermablade is a flexible one-piece shave biopsy instrument designed by a dermatologist for cutaneous surgery giving smooth clean excisions with less tissue trauma. Dermablade is individually packaged and sterilized.

Dermaplane blades

Personna's Dermaplane blades have a round safety tip and are Comfort Coated® to reduce friction. Manufactured from stainless steel, Dermaplane is individually packed and sterilised and intended for dermaplaning and aesthetic treatments.

Biopsy, Currettes and Punches

Personna's biopsy currettes and punches are ergonomic to use, sterile and disposable blades designed for curettage, electrodesiccation, excision and biopsy.

Histology and Pathology

Personna's microtome blades provide histologists with unrivaled clarity, minimal compression, and the precision required for effective grossing, sample creation and screening.
